

JOURNÉE SAGUENÉENNE EN VENTILATION MÉCANIQUE

Stéphane Delisle, Philosophiæ doctor PhD, FCCM
Professeur associé de la faculté de médecine du département universitaire
de médecine de famille et de médecine d'urgence, UdeM

RECRUTEUR OU NON RECRUTEUR ?

RECRUTEMENT EST UN PROCESSUS DYNAMIQUE

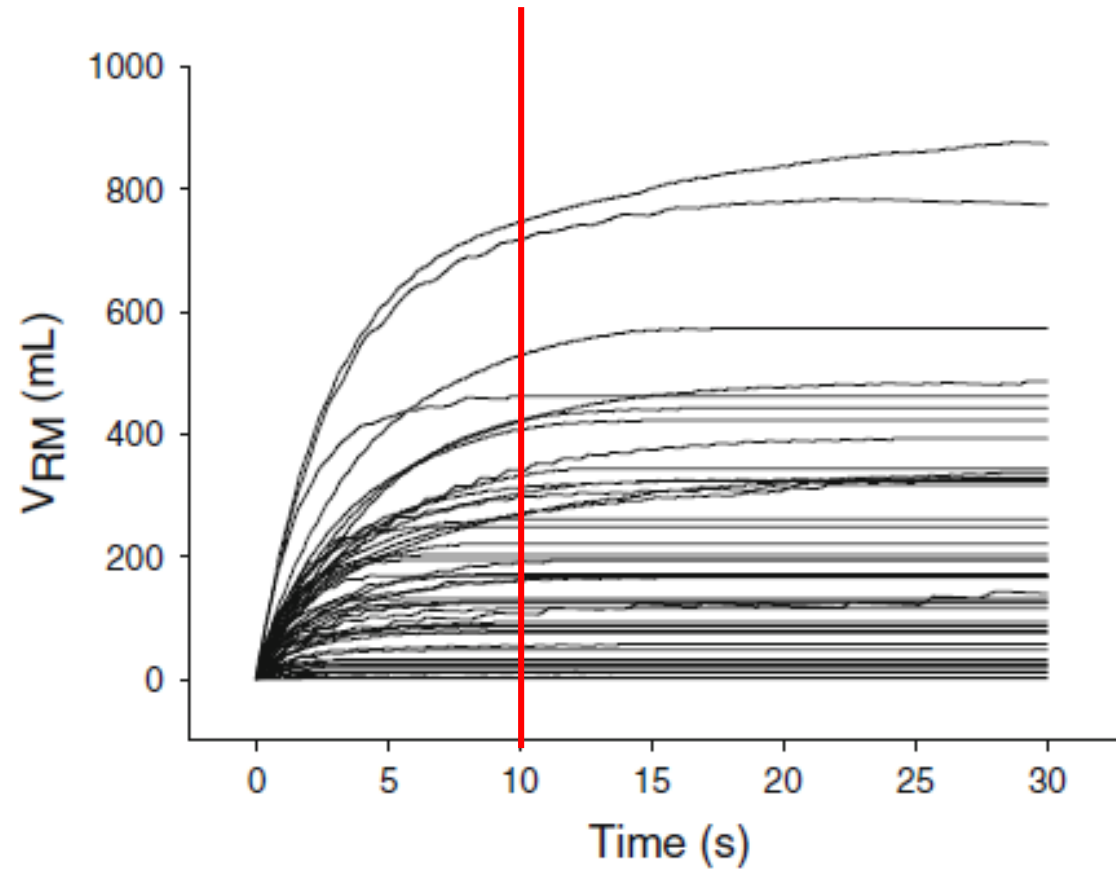

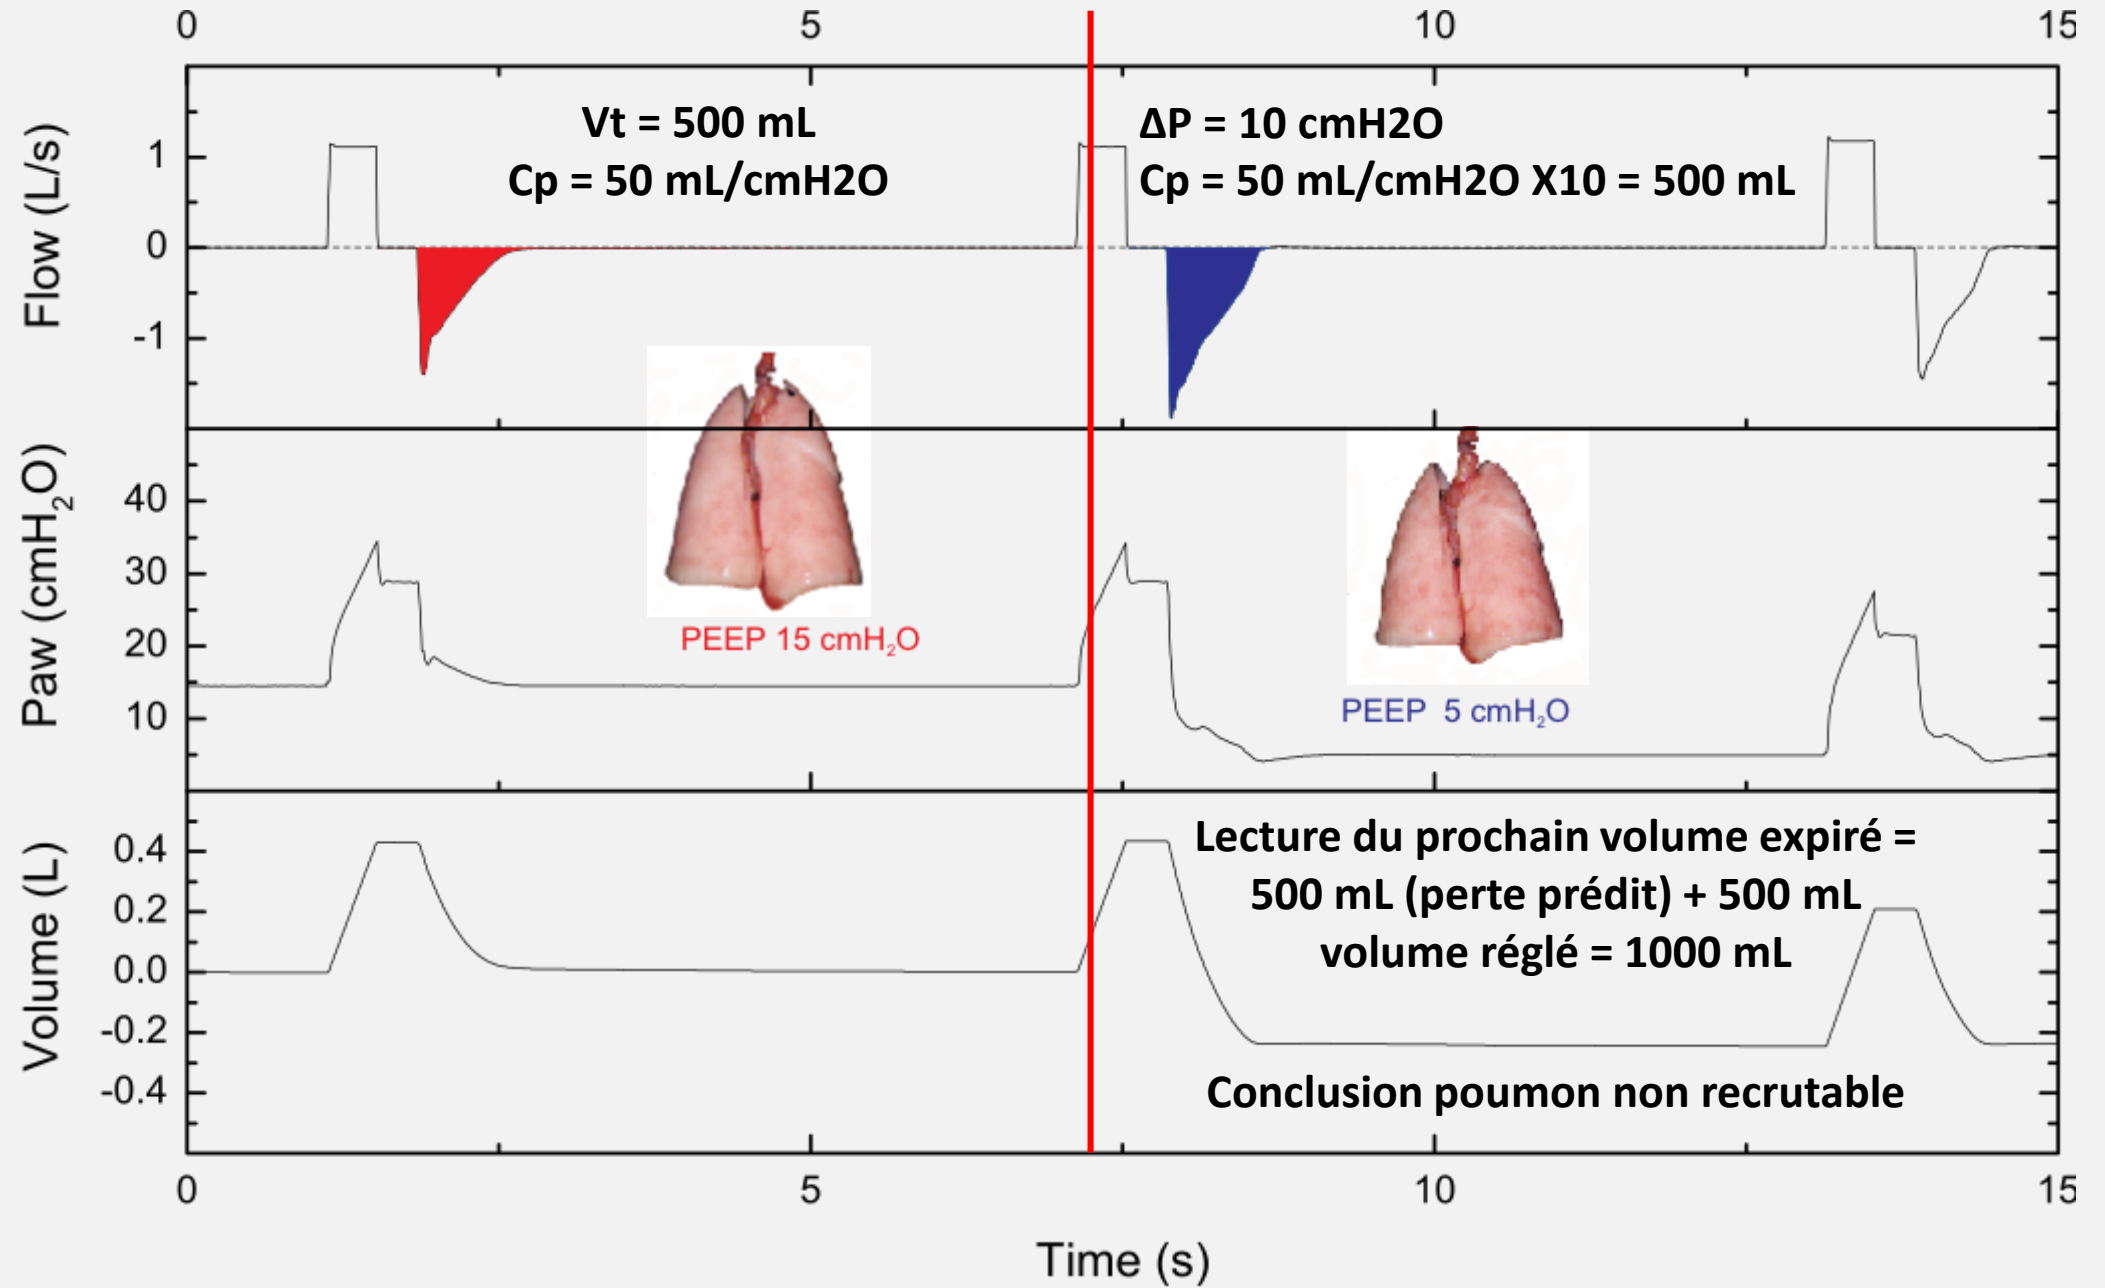

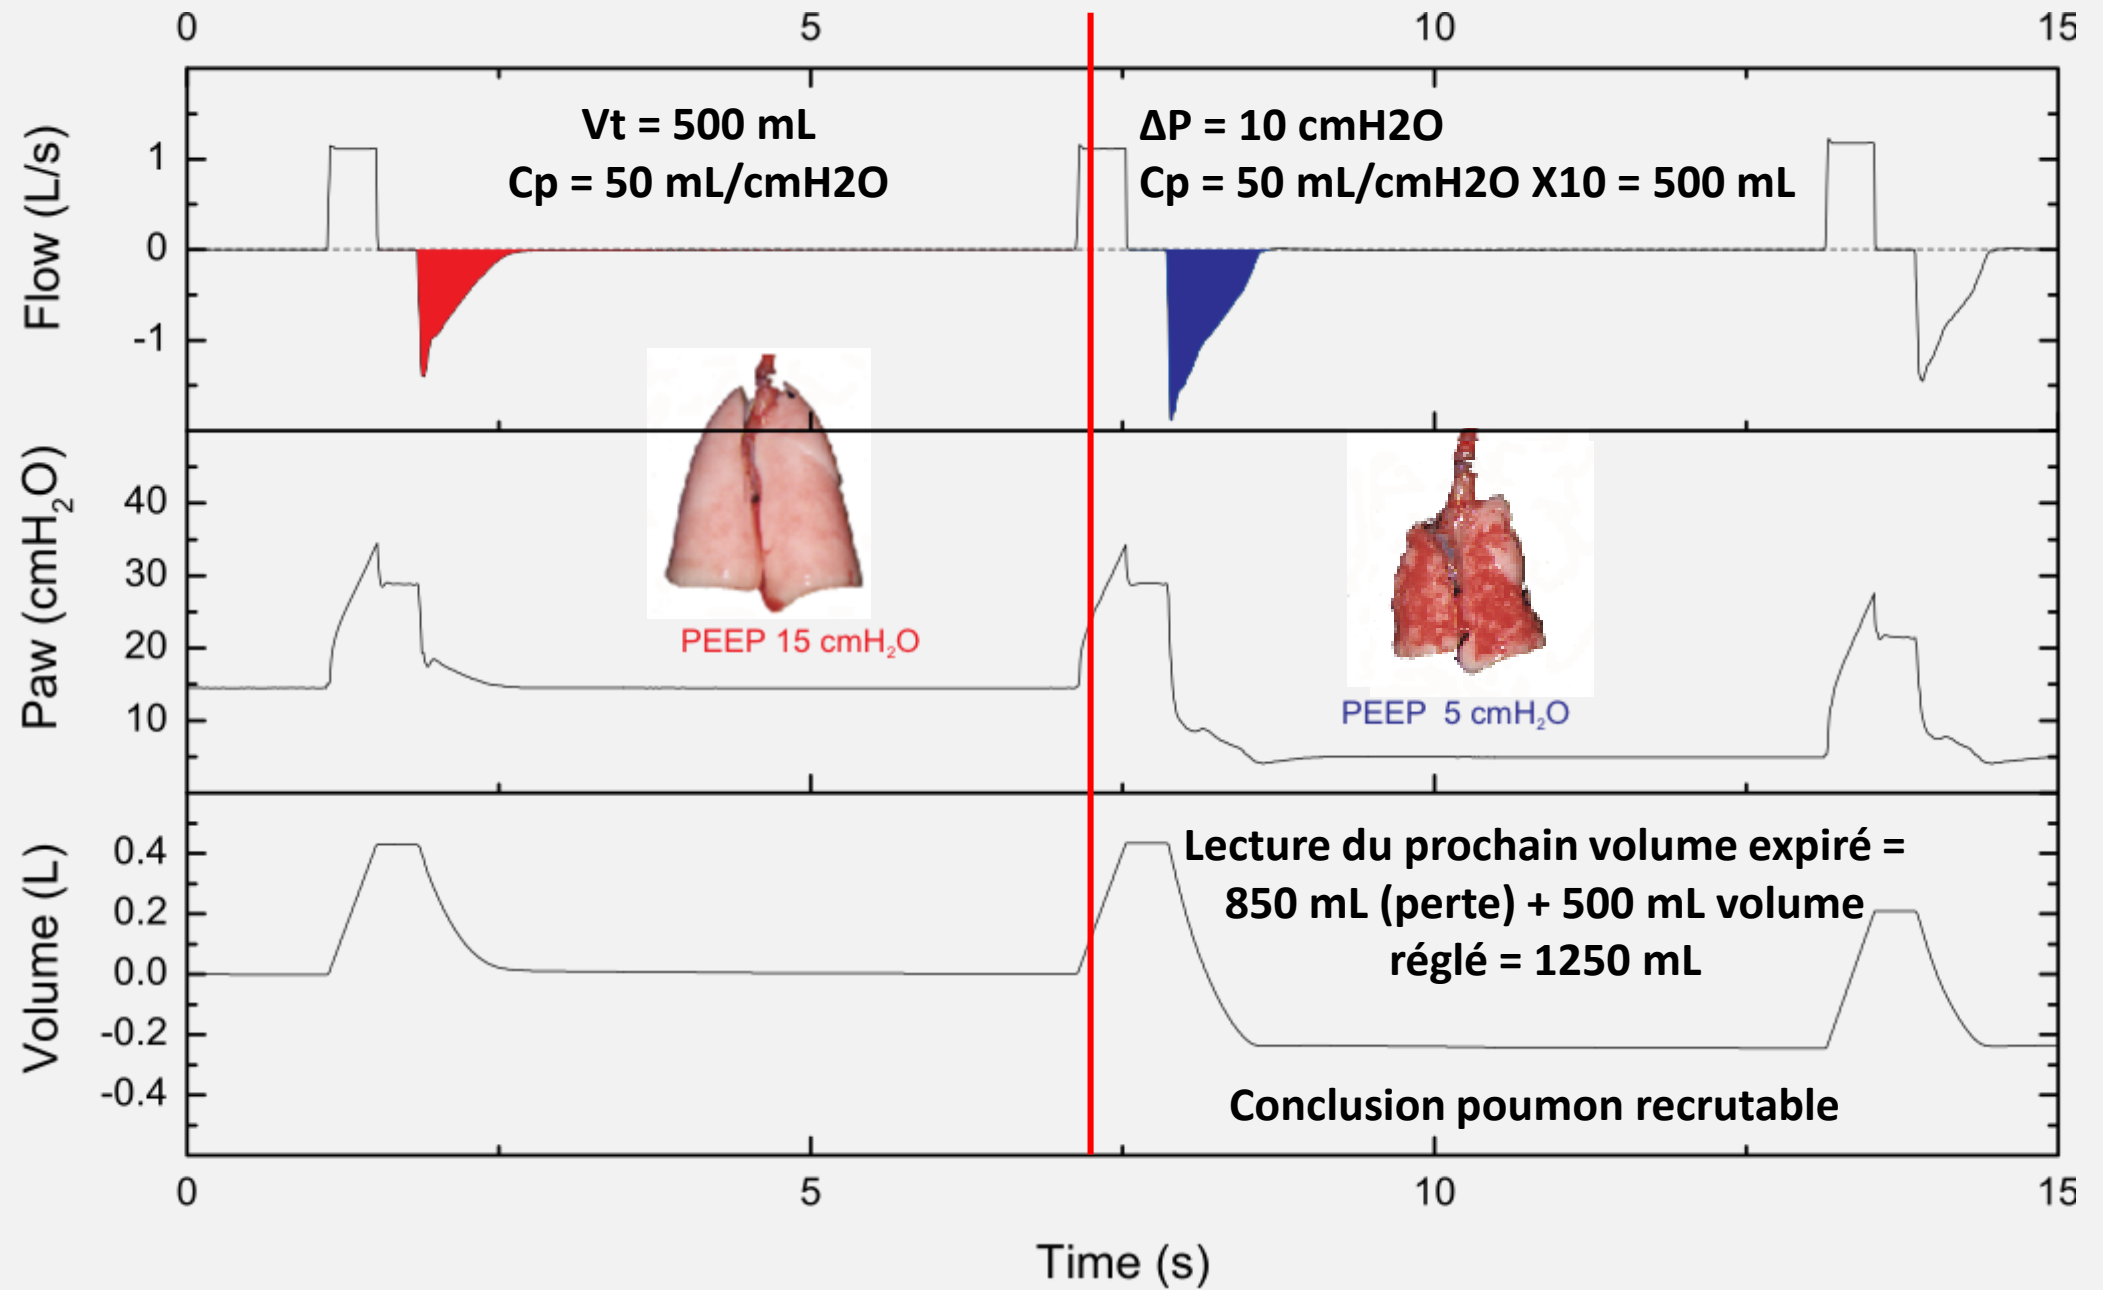

Fig. 2 Individual dynamics of volume increase during the RM. Each *thin line* represents a patient

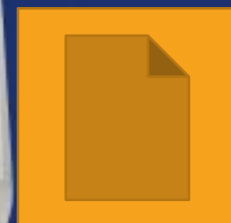

Technique simplifiée pour déterminer le potentiel de recrutement

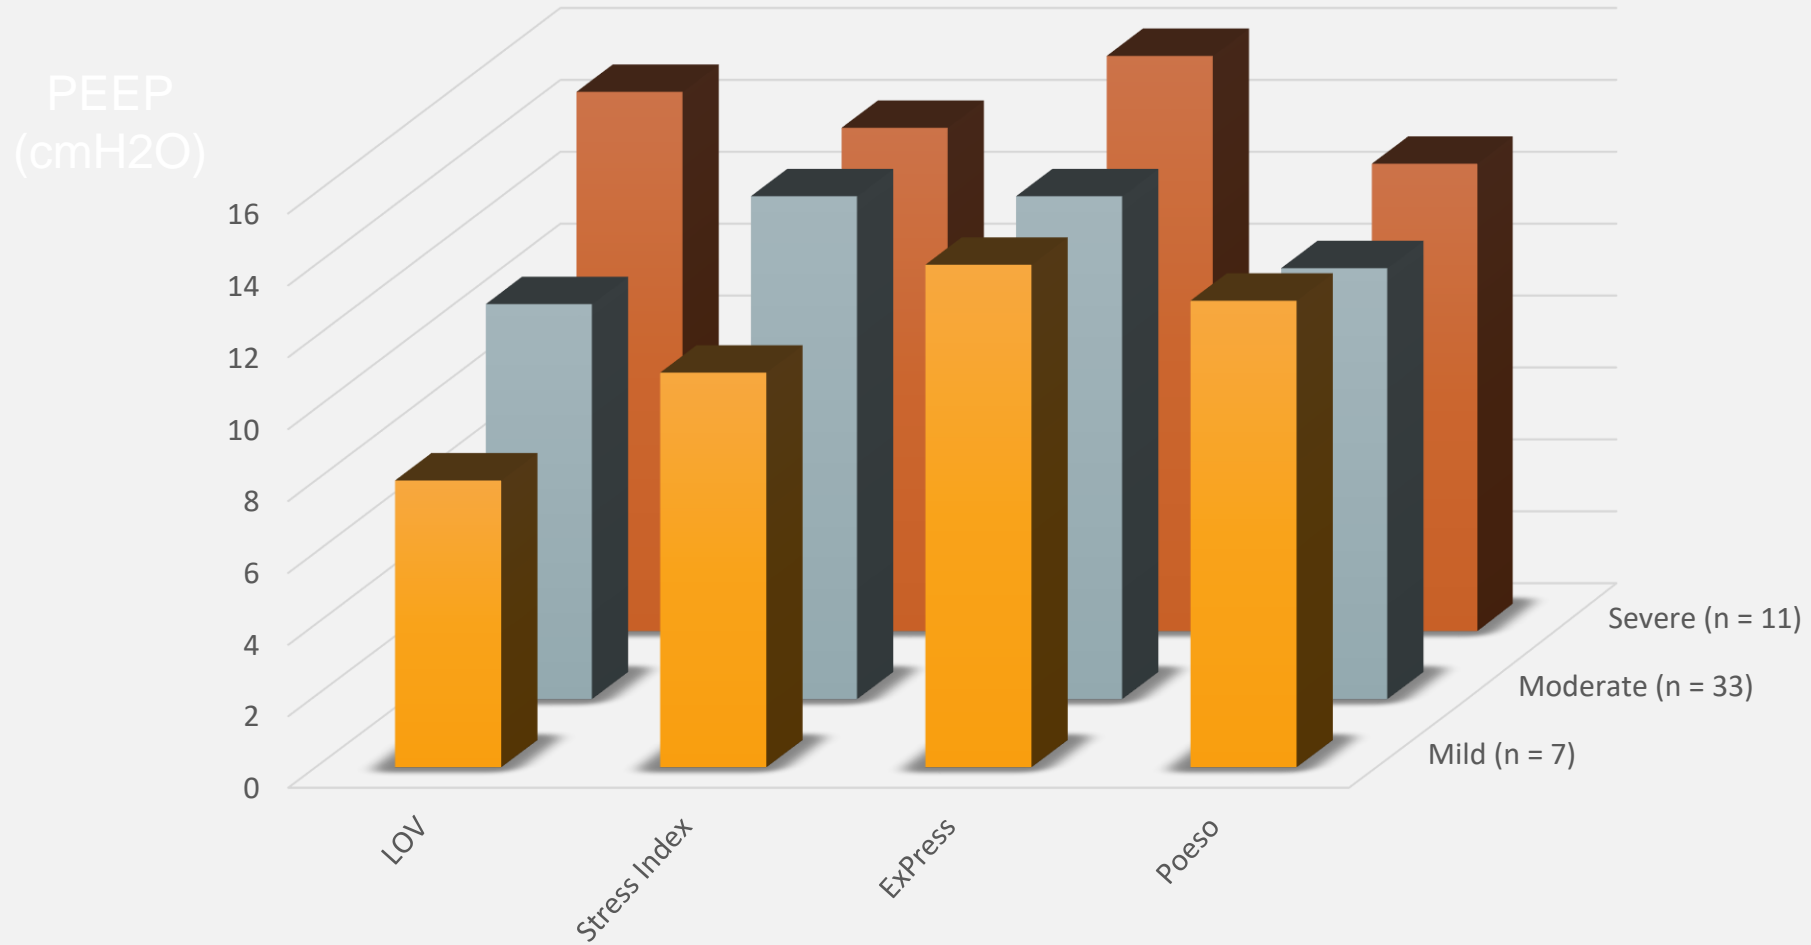

Technique simplifiée pour déterminer le potentiel de recrutement

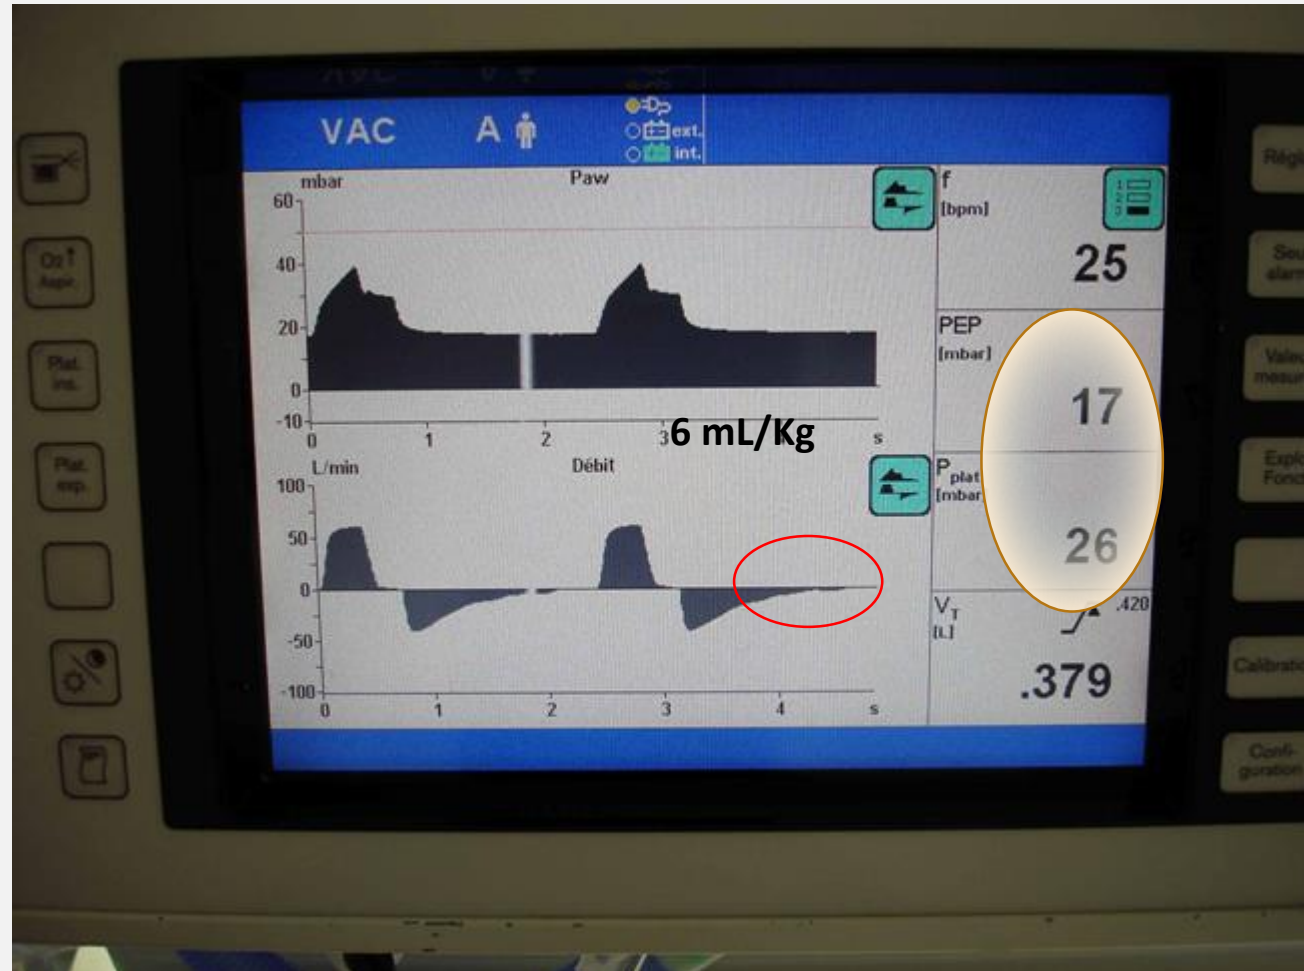

Evita Trainer

PEP : LOV vs SI vs ExPress vs Poeso

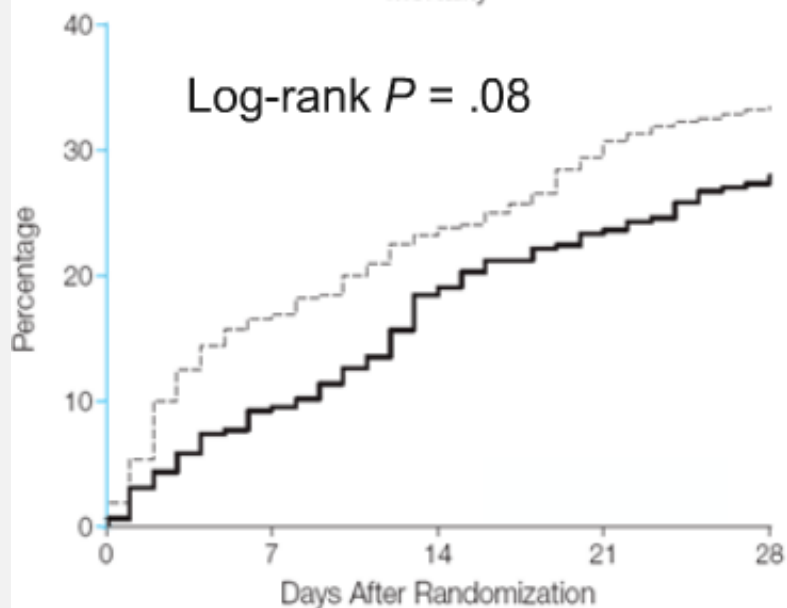

ExPress : Recrutement Alvéolaire maximal

ExPress : Post hoc analysis

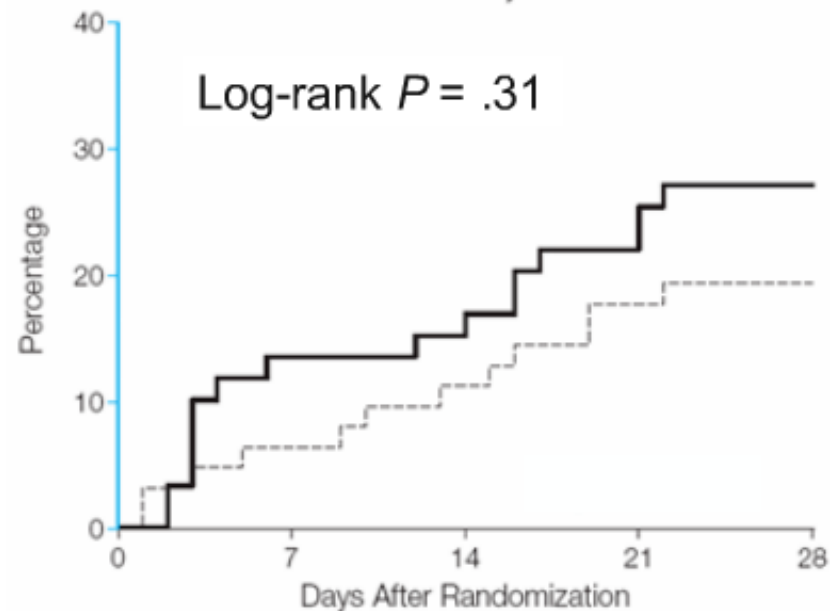

ARDS (n = 646)

Mortality

ALI without ARDS (n = 121)

Mortality

----- Minimal distension
———— Increased recruitment
